SUMMARY

3rd Year Computer Science student at Georgia Institute of Technology with a focus in artificial intelligence who is both passionate about front-end and back-end development.

EDUCATION

Georgia Institute of Technology   May 2024

- Bachelor Science in Computational Media
- GPA – 3.67/4.00

Relevant Coursework

- Design Analysis and Algorithms
- Data Structures
- Artificial Intelligence
- Computer Architecture
- Calculus I and II
- Linear Algebra

WORK EXPERIENCE

Undergraduate Researcher   January 2022 to Present

Georgia Tech VIP: Art and Artificial Intelligence | Python

- Group research participant regarding computer colorization of grayscale images through GANs and diffusion models coded within the PyTorch environment
- Obtained and cleaned multiple datasets for GAN prototypes implemented from research papers

Host   June to August 2022

Buffalo Wild Wings

- Responsible for greeting customers and managing table-layout design for servers in order to maintain an efficient and steady workflow for all employees.

ACTIVITIES

UGA Hacks 6 – C#, JavaScript   February 2021

- Programmed and managed the user interface for the game submission, "*Swap!*"
- Solved graphic user interface issues in C#

HackGT 8 – HTML & CSS   October 2021

- Created HTML structure code for conceptual shopping rewards Google Chrome extension, "*Suppl*"

Pacman – Java, Android Studio   December 2022

- Created the backend framework for a recreation of Pacman in Android Studio
- Coded Pacman movement and collision with objects
- AGILE Workflow Development

TECHNICAL SKILLS

Computer Languages	Software Programming	Other
• Java & C#	• Git & Github	• Microsoft Suite
• Python	• IntelliJ	• Chinese (Speaking)
• HTML & CSS	• Microsoft Visual Studio Code	• Japanese
• C	• PyTorch
